SCIGN sponsored the development of the following programs:

- **sharc** - new open-source code for GPS downloads
- **egads** - 'extensible GPS array data system' (controls downloads)
- **javaplotter** - interactively displays time series over web

  * ashcan (now superseded by sharc, but still available)

all are open-source and we encourage joint developments:

http://sharc.sourceforge.net/
http://egads.sourceforge.net/
http://javaplotter.sourceforge.net/

we are also testing a new interactive mapping tool and will post it to http://mapsurfer.sourceforge.net/ when ready (soon) - a preview version can be tested at:

http://tailings.gps.caltech.edu/mapsurfer/
